1   E-services: a look behind the curtain   ■

Richard Hull, Michael Benedikt, Vassilis Christophides, Jianwen Su
June 2003 **Proceedings of the twenty-second ACM SIGMOD-SIGACT-SIGART symposium on Principles of database systems**
Publisher: ACM Press

Full text available: 📄 pdf(269.51 KB)   Additional Information: full citation, abstract, references, citings, index terms

The emerging paradigm of electronic services promises to bring to distributed computation and services the flexibility that the web has brought to the sharing of documents. An understanding of fundamental properties of e-service composition is required in order to take full advantage of the paradigm. This paper examines proposals and standards for e-services from the perspectives of XML, data management, workflow, and process models. Key areas for study are identified, including behavioral servi ...

2   Infrastructure: Adding a fourth dimension to three dimensional virtual spaces   ▬

Robina E. Hetherington, John P. Scott
April 2004 **Proceedings of the ninth international conference on 3D Web technology**
Publisher: ACM Press

Full text available: 📄 pdf(336.66 KB)   Additional Information: full citation, abstract, references, index terms

The development of new standards for distributed data offer new possibilities to combine and display multiple types of information. This paper is concerned with an architectural and historical application of X3D and XML to objects, such as buildings, which have an organic quality and tend to evolve over time. The display of a 3D computer model does not always adequately describe the building or artifact and additional data are often required.This paper describes and evaluates techniques for the ...
